Lab 10:

Lab Slot: L5+L6 – INTERNET OF THINGS Domain Analyst

Name: Tanmay Mahajan

Regn. No: 19BCE1735

Faculty name: Dr. Sriramalakshmi P

Aim:-

Create a dataset with 5 columns (name, Regd no, elective name, score1 and score 2) in Knime Analytics and analyse the dataset

- Average of two test scores
- Score Status
- Difference between two test scores
- Recheck the status and based on the difference show if the candidate is eligible for interview call or not

WorkFlow:-
